

# JULIO RODRIGUEZ SENIOR SOFTWARE ENGINEER

## SUMMARY

Software Engineer with two decades of experience building scalable, accessible, and high-performance web applications, from early PHP/jQuery sites through modern React, Vue.js, and TypeScript platforms. A strong advocate for web standards, component-driven architecture, and Atomic Design principles, with production experience across Adobe Experience Manager, Storybook-documented design systems, and Progressive Web Apps. Deeply invested in the details users feel but don't always see: performance, SEO, Core Web Vitals, and accessibility. Comfortable across the full development lifecycle, from requirements gathering and interface design to implementation, testing, and long-term maintenance, with a track record delivering booking, marketing, and customer-facing applications for airlines, cruise companies, and consumer brands.

## SKILLS

HTML5, CSS3, JavaScript (ES6), TypeScript, React, Vue.js, SASS, Figma, Adobe Experience Manager, PWA, Node.js, Webpack, Git, Atomic Design, Framer Motion, BEM, jQuery, jQuery UI, Bootstrap, GSAP, Gulp, Google Analytics, Google Insights, Mailchimp, Mandrill, Adobe XD, Adobe Photoshop, Adobe Illustrator, Adobe InDesign, Sketch, InVision, Java, OSGi, Svelte, Gatsby, LESS, WordPress, Alpine.js, React Transition Group

**NCLH - Norwegian Cruise Line - Senior Web developer.**

**Jul/2018 – Present**

Lead front-end development for NCLH's booking and marketing platforms, applying Atomic Design and DRY component principles while building production Vue.js components integrated with the Soy (Google Closure) templating layer. Translate Figma, Adobe XD, Photoshop, and Sketch/InVision mockups into pixel-perfect, interactive modules, using Webpack, ES6, jQuery, and SASS/BEM to build and bundle production front-end features.

**Everymundo.com - Front-end developer.**

**Dec/2016 – Jul/2018**

Translate airline clients mock-ups designs into pixel-perfect accessible and SEO ready websites. Creation of React Components (booking, price calendars, flights accordions...) following clients Brand Identity and providing a customizable style guide using StoryBook replacing legacy (Twig) modules. Testing using Karma, Mocha and Chai. Working with Bootstrap, Vanilla JS using ES6, JQuery, Less, GIT. Implementation of Progressive Web Apps (PWA) to enhance airline website performance along with a better UX.

**LVMH OnBoard.com - Frontend developer.**

**Nov/2015 – Present**

Bring PSD designs and interactive features to a Drupal CMS. Use of Ajax, AngularJS and Responsive Design using Bootstrap3 and ensuring site optimization and best SEO practices using MOZ, Google Insight, YellowLab and Webpagetest reports. Email campaigns development using Mailchimp and Mandrill. Working with Adobe Suite. And control version with GIT. Introducing service workers and push notification features to the website.

**Original Impressions - Web developer.**

**May/2015 - Nov/2015**

Web development and maintenance of customer's websites like BurgerKing, ClubMed, Pollo tropical, Handtevy, MapatravelGroup, Gibraltar Bank. Artwork preparation and customization for marketing advertising using Adobe Suite.

**Websites Development - Independent Frontend**

**2005 – Present**

Ongoing freelance web design and development practice for individual and small-business clients. Build React side projects using Hooks, Redux, and the Context API, alongside static and JAMstack sites with 11ty, Astro, and Gatsby. Customize WordPress themes and plugins, and optimize sites for SEO and email marketing campaigns.
